

Who We Are:

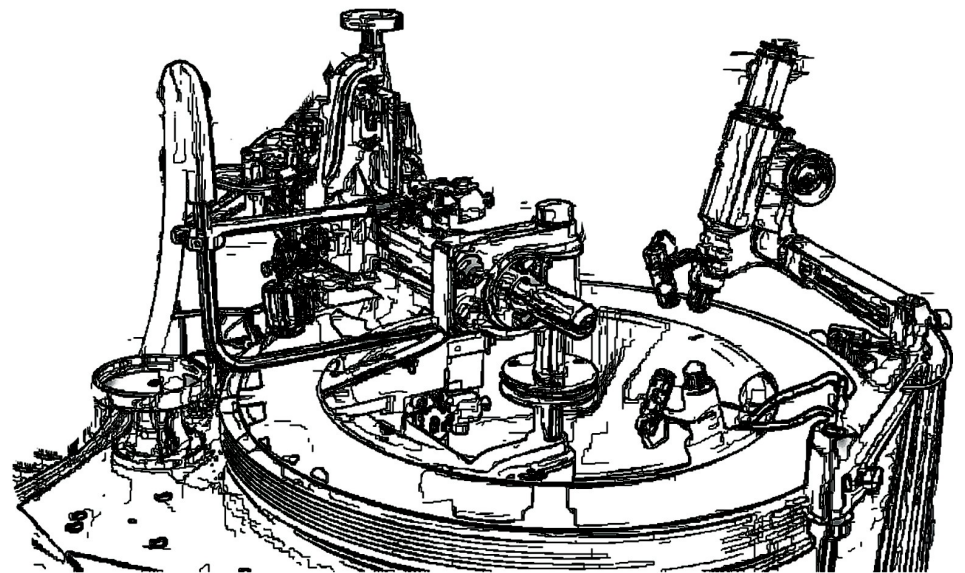

Mobile Vinyl Recorders are audio mastering engineers based in Seattle, WA and Tucson, AZ with a passion for making vinyl records. We use restored vintage disc cutting lathes to create records, one-at-a-time, in real time. We have appeared all over the world at over 80 festivals and events since 2011.

What We Do:

We can travel anywhere in the world to bring this antiquated art form to your marketing activation, party, festival, record store, or bar mitzvah. We have many different equipment configurations, record mediums, and packages to meet your budget. We love to educate people about the vinyl making process and provide a spectacle that can be the centerpiece of your event.

We can cut records from a pre-recorded song, set up a “recording booth” so your guests/clients can walk away with a one-of-a-kind record of their voice or musical performance, teach your attendees how to make hip hop beats on sequencers and drum machines, or bring professional songwriters and freestyle rappers to create custom songs for your guests.

Whether you want custom records cut onto high quality lacquer dub plates, picture discs made from clear polycarbonate plastic, plastic picnic plates, cds that will play on your cd player AND your turntable, Brass, Copper, or discarded laserdiscs, we can work with you to create a unique experience for your event.

EVENTS

Activation Types

Pre-Recorded Tracks

- Client partners with artists or labels to promote new singles or previously unreleased tracks for unique guest takeaways.

Attendee Recording Booth

- Allow attendees to record a song, poem, spoken word, dedication, or even karaoke straight to vinyl!

Hip Hop Boot Camp

- We teach your guests how to make Hip Hop Beats using Drum Machines, Sequencers, and Synthesizers and then cut their beats straight to vinyl!

Custom Songwriting

- We bring professional songwriters and freestyle rappers to turn information about your guests into customized songs on a vinyl single!

Hip Hop Beats Bootcamp

Drum Machines, Sequencers, and Synthesizers where your guests get to create their own beats and walk away with a custom vinyl records of their creations.

SUSTAINABILITY!

We love (and have many options for) sustainability, recycling, upcycling, and otherwise turning humanities' discarded ephemera into works of musical art!

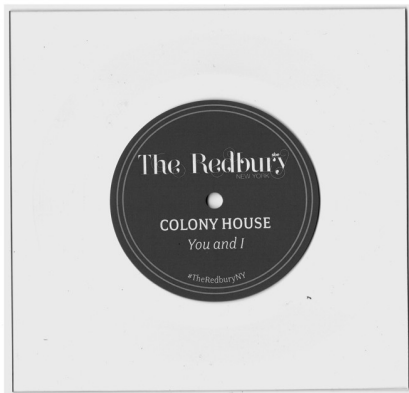

We can make playable records from:

- Used CDs**
- XRays**
- Laserdiscs**
- Plexiglass Drops**
- Copper Scraps**
- Brass Scraps**

We can also help you make packaging from reclaimed and recycled paper stocks!

Disc & Packaging Types

We can make records out of many different materials; Lacquer Dub Plates, Plexiglass, CDs (that play on your Turntable AND your Cd Player), Copper, Brass, Plastic Picnic Plates, SilkScreened and Full Color Picture Discs! We can also provide or help you source many different types of eye-catching packaging and art designs!

Clear, 7" Square Polycarbonate

Full Color Sleeves

MOBILE VINYL RECORDERS
Live Record Cutting Exhibitions

Full Color Picture Disc

If you are a fan of Mythbusters, check us out on their spinoff, the Netflix Original Series White Rabbit Project, where we build them a palm sized windup record player out of clock springs, plumbing parts and a rotary dial phone, and cut them a 1.5" record to play on it! Season One, Episode 9

PRICING

Every activation and location is different, and we will work with you to customize the most effective activation for your event. Therefore, we don't have a set price guide. Our activations (including all expenses) start in the range of \$5,000 for a single lathe and \$9,000 for a four lathe event. The following are determinations of cost:

1) Distance away from Tucson, AZ

- For our standard Four-Machine package, we must drive a 15 passenger van full of equipment across country from Tucson.

2) Length of Event

- Multiple days event get much cheaper per day when you spread out the travel costs over extra days.

3) Type of Activation & Number of Machines

-Our "Hip Hop Beat Boot Camp", "Custom Songwriting", and "Recording Booth" activations can be done with one lathe, which we can fly anywhere in the world. This makes it somewhat cheaper than the 4 lathe events.

4) Number of Pre-Cut Discs

-Want more takeaway discs than can be cut in real time at your event? No problem! We can prepare as many discs as needed in advance at our Tucson disc cutting studio!
